Detail of Change Request
<p>Background</p> <p>MPRN/Site Address change requests are sent by suppliers to ESNB via the 013 message. Each site address change is outsourced and reviewed by a member of the Networks Database team. Some change requests involve lengthy investigations before a decision is made as to whether to change the site address or not.</p> <p>If the address change proposed is accepted a 114 is sent indicating this. If ESNB decides that the requested address change is not appropriate, an 014R message is sent with a rejection reason IID.</p> <p>ESNB are responsible for the site or MPRN address whereas the Supplier determines the notification or general communication address.</p> <p>Please see Appendix 1 for existing list of Rejection Reasons</p>

Detail of Change Request

The Issue

The issue involves the lack of clarity as to why an address change was rejected. The IID reject reason is used for a variety of reasons and provides no view as to why ESBN decided to reject the proposed site address change.

Suppliers find it difficult to provide answers to customers who are asking why the site addresses they requested to be changed have not been changed.

The Proposition

It has been proposed to add more specific site address change reject reasons to the list. The list of reject reasons is below.

- AD1 Duplicate street address/numbering exists in the city/street proposed.
- AD2 Approval not received in writing from Local Authority to change street/dev. name.
- AD3 DUoS group conflict here.
- AD4 MPRN stated either terminated or disconnected
- AD5 Being dealt with as a bulk address correction for the development.
- AD6 Requested address change does not conform to the regional structure.
- AD7 No payment for DMR

The ESBN user who decides to reject the site address change will be prompted to select an appropriate reject reason from the above list.

This reject reason will be sent on the 014R message as is the current practice.

Reason for Change Request

To provide more clarity to suppliers as to why an MPRN/site address was not changed as requested.

This will facilitate better customer service to supply customers. It will also reduce the number of queries sent to ESBN by suppliers requesting explanations as to why site addresses were not changed.
